

Web Developer – Inhance Technology April 2018

Role overview

- Designing and developing advanced applications for web platform.
- Unit-testing code for robustness, including edge cases, usability, and general reliability.
- Bug fixing and improving application performance.

Job brief

We are looking for a web Developer who possesses a passion for pushing mobile technologies to the limits. This web developer will work with our team of talented engineers to design and build the next generation of our mobile applications.

Responsibilities

- Design and build advanced applications for the web platform.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

Essential skillset

- Language: Java, Javascript.
- Platform: Tomcat, NGINX, MySQL, Linux.
- Framework: Spring, Hibernate.
- BS/MS degree in Computer Science, Engineering or a related subject.

Desirable, not essential

- Language: Python.
- Platform: Amazon Web Services.
- Framework: Junit, or another unit testing framework.
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies.
