

## **Android Developer – Inhance Technology April 2018**

### *Role overview*

- Designing and developing advanced applications for the Android platform.
- Unit-testing code for robustness, including edge cases, usability, and general reliability.
- Bug fixing and improving application performance.

### *Job brief*

We are looking for an Android Developer who possesses a passion for pushing mobile technologies to the limits. This Android app developer will work with our team of talented engineers to design and build the next generation of our mobile applications.

### *Responsibilities*

- Design and build advanced applications for the Android platform.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

### *Essential skillset*

- BS/MS degree in Computer Science, Engineering or a related subject.
- Remote data via REST and JSON.
- Experience with Android SDK.
- Experience with third-party libraries and APIs.

### *Desirable, not essential*

- Have published at least one original Android app.
- Proven software development experience and Android skills development.
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies.
